EXPLORE SPORTING PLEASURE 2025

Establish from 1963, Aropec Sports Corp. is an outstanding manufacturer with ability to make OEM/ODM/OBM project practical and with R&D team to do the research on new trend and functional materials, to make us irreplaceable for our global customers over 88 countries. **Our core value is "MAKE IT REAL"**. We are good at making ideal products into real. With decades of professional experience, strict quality control on fabric and full knowledge, we have the ability to give you full suggestion according to your budget and project! Also, we have our own brand **"AROPEC"**. We know and we focus on all the details for a brand as carefully as our own for our customers.

5 Strong advantages for customers to cooperate with Aropec

- ✓ **Excellent Design Ability-** Through decades of design experience on all kinds of materials and working solution, we have complete and accurate R&D capacity to make your design real!
- ✓ **Quality Product Manufacture Ability-** We go through 55 years of working experience, have wide various kinds of materials sourcing ability, producing equipment and well-training of workmanship, we have excellent manufacture capacity and ability.
- ✓ **Product Quality Administration And Assurance Ability-** We operate own brand and market over 88 countries. We have strict product quality checking and strong business administration for our global customers.
- ✓ **Meeting Target Market Ability** - We can find and suggest optimized materials to meet your target price or value-added markets!
- ✓ **Integration Marketing Blitz Ability** - We can supply wide various range of your industry, to provide "one stop shopping" customer satisfaction!

- SBIR-Innovation Research Program
- Taiwan Excellence Award: AquaThermal series, Triathlon wetsuits, Endurance and Tri-compression
- CITD-Industry Technology Development
- R&D team-Analysis on trend stylish, materials research for foam, fabric, printing....etc.

- Excellent sales team with full knowledge solves your problem and inquiries.
- Pre-schedule Production Plan makes orders on time.
- Specialist shipping team makes fluent & cost-saving international delivery service.

- Template for all wetsuits maintain size quality and lasting
- QC on production procedure examines all details.
- Brand-making keeps quality better and better.

- ISO 9001 2015 Certification System
- Taiwan Excellence Award
- Pattern Protection
- Global Customers over 88 countries

- › 25lb Back Inflate BCD
- › 3D Cut Air Bladder: Inflates evenly. The inner bladder is made of durable 420D TPU fabric, while the outer bladder is made of 600D*1200D polyester. Both the inner and outer bladders are easy to replace.
- › Double tank straps ensure secure holding for single-tank use.
- › Lightweight aluminum backplate with a removable soft back pad and shoulder pads for extra comfort while diving.
- › The chest features six stainless steel D-rings, providing plenty of space to attach tools and accessories.
- › A special quick-release weight system with a Velcro design allows for easy adjustment of weight placement.
- › Rotating shoulder strap buckles adjust the angle of the webbing under the shoulders to fit different body shapes.
- › Adjustable crotch strap with a quick-release buckle for easy adjustment and removal.
- › 3 dump valves, one on the shoulder, one on the lower left, and a quick-release valve on the BCD hose for easy deflation.
- › Reflective strips on the shoulders improve visibility and safety underwater.
- › Top carrying strap for easy handling and transport.
- › 19" Hose with K-Valve.
- › 22" BCD Inflation Hose.
- › Optional add-ons: Quick-release tank straps, Velcro weight pockets

Double straps

AROPEC HIGH QUALITY BCD WITH A VARIETY OF SIZES IS DESIGNED FOR GENERAL DIVING, TECHNICAL DIVING, AND TRAVEL DIVING.

BC-SUMMIT CE

- › Heavy duty 840D bladder material for superior strength and durability
- › High density 840D PVC fabric and 600D polyester fabric
- › 10# YKK zipper
- › Weight-integrated with quick releasable weight pocket
- › Separate weight pocket has been designed to accommodate various lead sizes
- › Adjustable cummerbund waistband and shoulder straps ensures snug fit
- › Three stainless steel D-ring on shoulder, two stainless steel D-ring on bottom
- › With three dum-valve, two upper over pressure valves at the shoulders with rapid exhaust feature, one on lower right
- › Dual size knife hold to accomodate almost every knife available
- › Soft back pad for back protection
- › Double tank belts
- › Two rear non dumpable weight pockets, each holds up to 5lb
- › 16" Airway, compact power inflator
- › 26" LP hose
- › CE certificate
- › Buoyancy: XS: 12.25KG (27LB), S: 13.6KG (30LB), M: 16.33KG (36LB), L: 18.15KG (40LB), XL: 20.4KG (45LB)

- 100% 3mm Super-Stretch 2PC Wetsuit, Man
- (Jacket) 3mm Super-Stretch L/S Jacket

- Neckline: In order to reduce the discomfort of the neck skin rubbing against the fabric and increase the durability of the cold-proof clothing, the neckline is edged with black Lycra cloth to increase the comfort of the neck skin rubbing against the fabric and increase the durability of the cold-proof clothing. Durability.
- Shoulders: Use black nebula dot pattern rubber ink anti-slip printing, the pattern on the right shoulder is inlaid with Aropec's round bright and beautiful wave totem; the above pattern design and rubber anti-slip printing, in addition to adding Aropec In addition to the brand recognition of the product, if you need to carry something on your shoulder when wearing this cold-proof jacket, such as a diving buoyancy vest BCD, you can increase the anti-slip effect of the BCD so that the BCD will not sway around.
- Front chest zipper: Use the latest black NA9 zipper manufactured by YKK in Japan. The important value of this new zipper is that the YKK zipper is developed using the same Poly material, which facilitates the recycling and re-melting of the zipper in the future. , then drawn into yarn, and then woven into cloth for circular economic use. It is Japan's YKK's world-leading zipper technology.
- The ingenious design of functional fabric distribution: the chest, back and sides of the body, areas of the human body that require core temperature insulation, are lined with super-elastic heat-storage and heat-insulation fabrics to enhance the heat-storage and heat preservation effect.
- The shoulders, armpits and long sleeves are made of super-elastic, smooth and non-water-repellent AQ high-grade fabric for the inner lining due to the needs of activities and the effort-saving design for easy putting on and taking off. In addition to making it easier to put on and take off, it makes Activities are smoother and more comfortable.
- Top hem: The black Orca Skin reflex lining is used to form a tight waterproof Skin Seal, so that water splashes during water activities will not splash or seep into the body from the hem of the top, and can continue to maintain the body's comfort Tight and warm condition.
- Top cuffs: The ends of the cuffs are not hemmed, allowing the super-elastic material to exert its most extended and comfortable effect, without the feeling of being caught by the hemming, and to avoid the possibility of the hemming breaking and falling off. It makes putting on and taking off more convenient and effortless.
- The inside of the end of the cuff is equipped with two rings of rubber ink anti-slip printing. Its function is to prevent excessively elastic materials from allowing water to penetrate into the inside of the sleeve at a relatively high speed during water sports, causing accumulation of water or body temperature. decline and discomfort.
- Gluing and sewing machine: Full body gluing technology uses manual and pneumatic machine to stick tightly to prevent water from penetrating, improve warmth retention, and effectively reduce water seepage rate to achieve the effect of keeping warm and preventing cold. Double blind stitching is used on the outside to make the seams more durable; single blind stitching is used on the inside, which not only prevents the seams from cracking, but also effectively reduces the friction between the inner stitching and skin contact. feeling of discomfort. Generally, high-end cold-proof clothing has such a detailed design.

- (Pants) 3mm Super-Stretch Long Pant

- The ingenious design of functional fabric distribution: the front crotch and rear buttocks, areas of the human body that require core temperature insulation, are lined with super-elastic heat-storage and heat-insulation fabrics to enhance the heat-storage and heat preservation effect.
- The sides of the long legs, front knees and back legs are made of super-elastic, smooth and non-water-repellent AQ high-grade fabric for the inner lining due to the need for movement and the labor-saving design for easy putting on and taking off. In addition, it makes activities more convenient and comfortable.
- Knees: Use rubber ink anti-slip printing with new black line design; in addition to increasing the appearance, it also increases the wear resistance and anti-slip effect of the knees, making water activities safer and more comfortable.
- Trouser head: Generally, the trouser head of cold-proof trousers is directly folded at the top and covered with elastic bands and drawstrings to tighten the trouser head. These trousers are high-priced water sports clothing. Our company carefully designed the original trousers and drawingstring design. At a distance of 2 centimeters from the trousers, a channel for the exclusive trouser drawstrings was stitched. After many trials and tests, Repeated actual water activity tests have shown the great advantage of not causing too tight indentations on the abdomen and waist, and greatly increasing the comfort of wearing trousers.
- Gluing and sewing machine: The whole body gluing technology uses manual and pneumatic machine to stick tightly to prevent water from penetrating, improve warmth retention, and effectively reduce water seepage rate to achieve the effect of keeping warm and preventing cold. Double blind stitching is used on the outside to make the seams more durable; single blind stitching is used on the inside, which not only prevents the seams from cracking, but also effectively reduces the friction between the inner stitching and skin contact. feeling of discomfort. Generally, high-end cold-proof clothing has such a detailed design.

About AquaThermal-V1

To produce the best technical water sports apparel, you need the most technically advanced materials and the highest quality design and manufacturing techniques. AquaThermal is a nano-technical apparel series of water sports which combines a number of key performance features to provide essential warmth and windproof protection to enhance your performance on, in or around the water

Outer Layer

The super elastic Nylon based Lycra fabric makes your movement freely. The Nylon based Lycra fibers provide better durability, combining the outer and middle layer ensures protection from UV rays SPF 50+.

Middle Layer

The microporous is 4-way stretch film with breathable, windproof and water resistant outside, air and sweat permeability from inside. Windproof to protect you from wind-chill, water resistant function provides a protective shell to against water pressure, and the technical air permeability allows sweat to be drawn away.

Inner Layer

High quality 4-way stretch elastic Polyester Fleece has a lofted fiber structure that creates thermal air pocket to prevent the loss of body temperature and regulate core warmth. We adopt the best insulating materials remain highly weather resistant, durable and soft to the touch.

About AquaThermal-V2

Introducing our revolutionary thermal protection garment line: New Aqua-Thermal-V2. This multi-sport, thermal garment line uses the latest thermal technologies to provide comfortable, essential warmth, windproof, breathable, water resistant, neutrally buoyant, and flexible protection. The AquaThermal-V2 line combines excellent AquaThermal fabric with our professional experience with our well known super-stretchy neoprene wetsuit technology together, with our passion for adventure in, on and under the water, to produce a truly versatile lightweight multi-piece system. Whether worn as stand-alone garments or used in combination with other pieces to achieve multiple combination possibilities, the AquaThermal-V2 product line is beyond diverse.

How it's made

Outer Layer

Super Stretch Multidirectional Nylon based Lycra fabric provides you with unlimited natural freedom of movement for any activity. The Nylon based Lycra fibers provide significant durability, abrasion and UV light. It combines the outer and middle layer ensures protection from UV rays SPF 50+ and water resistant preventing water from adding weight to the garment.

Middle Layer

The Microporous TPU Film is 4-way stretch film with breathable, windproof and water resistant outside, air and sweat permeability from inside. It is breathable to allow moisture and air to wick away from your skin while wearing out of the water for additional comfort. Windproof to protect you from wind-chill, water resistant provides a protective shell to against water pressure, and the technical air permeability allows sweat to be drawn away.

Inner Layer

Made from an advanced technology Elastic Polyester 4-Way Stretch Fleece, which has a lofted fiber structure that creates a thermal warmth from the water next to your skin to prevent the loss of body temperature and regulate core warmth. This Polyester Fleece is the best insulating material, which is also highly water resistant and durable. With the best feature of all is that it is soft to the touch and non-chafing of enjoyment to all of your outdoor activities.

Combined with Super Stretchy Neoprene

After above three layers of materials lamination together, the AquaThermal fabric appear slightly less stretchy. Aropec use our Unilon-Sponge which rubber sponge passed 201 substances in the Candidate List of Substances of Very High Concern (SVHC) and passed the Regulation (EC) No 1907/2006 concerning the REACH, and PAHs comply with ZEK 01.4-08 of German ZLS.

Aropec Unilon-Sponge glue outer and lining with super stretchy fabrics which with OEKO-Tex and Bluesign Green Label certification, provide superior elastic stretch. Aropec combine both AquaThermal fabric and Super Stretchy Neoprene together, matching with Aropec professional 3D wetsuit template technology, our passion finally achieve the best effort. So we highly introduce our revolutionary thermal protection garment line: New Aqua-Thermal-V2.

Whether worn as stand-alone garments or used in combination with other pieces to achieve multiple combination possibilities, the AquaThermal-V2 product line is the best choice always.

WATERPROOF CAR SEAT COVER

汽車防水座墊

CSC-FRONT-BK

Installation

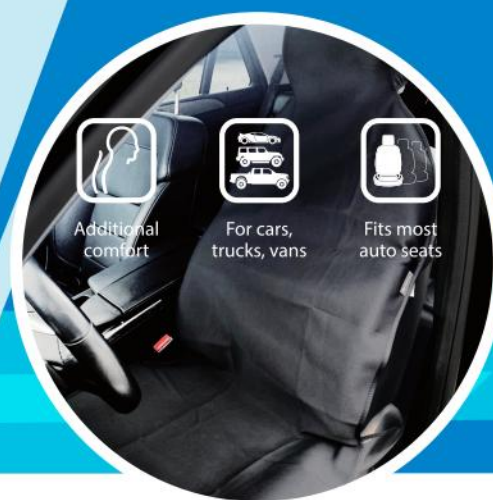

- ▶ Slip cover over headrest and fasten with elastic band. Fix it at the seat with S hook.

Material

Outer layer : 100% Polyester
Inner layer : 100% Neoprene

Contents

Front seats
One-Piece design including headrest / seat back / cushion

Feature

Protects against stains and easy washing. Suitable for using as warm pad in Autumn and Winter.
UNIVERSAL FIT – Our universal seat covers are designed to fit most vehicles type

Easy to install:
The headrest is made of stretch fabric
The seatback is side-less design with elastic band plus quick release clips

Size

Dimension size:
145cm x 58cm

WATERPROOF CAR SEAT COVER

汽車防水座墊

CSC-BACK-BK

Installation

- ▶ Slip cover over headrest and fasten with elastic band. Fix it at the seat with elastic band and quick release buckle, put EVA strip at the seat aperture.

Material

Outer layer : 100% Polyester
Inner layer : 100% Neoprene

Contents

Rear seats (Three-seats)
Three pieces design including headrest / seat back / cushion.

WATERPROOF CAR SEAT COVER / 2025

Feature

Protects against stains and easy washing. Suitable for using as warm pad in Autumn and Winter.
UNIVERSAL FIT – Our universal seat covers are designed to fit most vehicles

Easy to install:

PORTABLE PRESSURE SHOWER BAG

Assembly Instructions:

Assemble the hose

Fill the bag with water through the top opening

Twist and secure the top cover

Inflate the bag by pumping air until it is well pressurized

Depress the nozzle to spray water

Disassembly Instructions:

Pull the valve to release the air inside

Remove the manual pump and empty the bag

Fold and pack the components into the portable bag

- SSB-HL01**
- › Portable Pressure Shower Bag
 - › Easily operated manual pump system ensures stronger water supply
 - › Foldable in small volume for easy carrying
 - › Compact tri-stands keep the bag upright from toppling down
 - › With a temperature indicator to avoid the water too hot to be used
 - › Suitable for showering, or washing equipment, etc.

AIRPRENE SUPPORTS

AIRPRENE is an advanced neoprene (U.S. Patent #4832010) that is revolutionizing sports medicine. Invented by a leading orthotist, this unique perforated fabric removes perspiration letting the skin "breathe" during strenuous exercise. Moisture goes out ensuring dry, comfortable support. Body heat stays in, keeping muscles, tendons, and ligaments loose and supple.
